To paint the iris, use *Reflected Light* on the lighter parts and *Warm Shadow* to do the shadows. For the white of the eye, apply *Cool Shadow*. It is very important leave the white of porcelain for the light spots. Eyelash: draw a line from the inner corner of the eye toward the outer corner with *Rich Brown*, already setting the tear duct with *Reflected Light*.

**Hair:** always consider painting the background before working on the hair strands in order to produce fluid blends. Start the hairs with *Reflected Light*, always demarcating the lighter parts, starting with the lighter strands to the darkest. Complete the hairs with pure *Warm Shadow* and use a blend of *Warm Shadow + Rich Brown* on the darker strands.
